

INTEGRATED PICTURE HANGING SYSTEMS

▶ WWW.ARTITEQ.COM

▶ INTEGRATED PICTURE HANGING SYSTEMS

Artiteq has developed a series of integrated picture hanging systems, which can be integrated in combination with recessed ceilings or plasterboard ceilings during new-build or renovations. The rail is integrated while the ceilings are being installed. These systems offer huge advantages to end users, with a hanging system becoming available throughout the entire space.

By selecting integrated hanging systems you set the standard for perfection. Combining picture hanging systems with recessed ceilings or plasterboard ceilings creates rooms with walls that can be designed flexibly and easily. And also for the long term, without damage to walls and without additional costs. This also results in considerable steps towards sustainable building management and cost savings.

- Picture hanging rail integrated in corner profile - suitable for recessed ceilings that don't use a side strip

When recessed ceilings are installed during a building project, the Ceiling Strip offers many benefits. It replaces the corner profile used in recessed ceilings, and at the same time, creates a completely invisible picture hanging system. The flexible picture hanging system is hidden in the discreet shadow line along the edge of the recessed ceiling. This shadow line can also camouflage any imperfections in the wall, such as those masked by a side strip. The invisible picture hanging system offers the flexibility to quickly and easily hang paintings and other wall decorations.

- ▶ Picture hanging rail integrated in side strip - suitable for recessed ceilings using a side strip

The Art Strip replaces the side strip which is used for the installation of recessed ceilings. The corner profile for the recessed ceiling is mounted to the Art Strip. Using the Art Strip for the installation of recessed ceilings, will make a picture hanging system available next to the ceiling. The picture hanging system will guarantee smooth and clean walls, and the flexibility to decorate them any way you like, without the need for tools.

WHITE RAL 9016

- Picture hanging rail for plasterboard ceilings and walls (drywall)

The Shadowline Drywall rail enables the placement of an invisible picture hanging system between plasterboard walls and ceiling panels. A discreet shadow line is the only element that appears between the wall and ceiling, and this is where the flexible picture hanging system is hidden. It is possible to install a hanging cord in the rail, anywhere you like in the room. Since the rail itself isn't visible, the hanging cords are suspended directly from the ceiling. Using the Shadowline ceiling system means you will always have a guarantee of smooth, clean walls, and the flexibility to decorate them any way you like, without the need for tools.

WHITE RAL 9016

► Picture hanging rail for plasterboard ceilings and masonry walls

The Shadowline Masonry rail has been specially designed for use with plasterboard ceilings and masonry walls. The Shadowline rail is installed on a masonry wall during the building or renovation phase. The Shadowline profile disappears completely in the shadow line next to the ceiling panels, yet still offers all the advantages of a flexible hanging system: undamaged, clean walls and the flexibility to quickly and easily hang paintings and other wall decorations and move them around as desired.

WHITE PRIMER RAL 9016

► Picture hanging rail integrated behind a cornice

The Deco Rail is a hanging rail for pictures and wall decorations that is mounted behind a cornice. The hanging rail system becomes invisible as a result, while still offering all the advantages of a flexible hanging system. Walls with a clean, smooth finish remain undamaged, even though it is still possible to hang and move paintings continually. Hanging wires may be clicked into the rail behind the cornice at any desired location. This is the major benefit of the Deco Rail; flexibility and a guarantee for a high-quality finish. There are many different styles of cornice rails, and this hanging rail can be installed behind every type.

DECO RAIL LED

WHITE PRIMER RAL 9016

► Picture hanging rail integrated behind a cornice with lighting profile

The Deco Rail LED is a hanging system and lighting profile, with subtle indirect LED lighting in one. With the lighting profile C362 by ORAC, you add indirect lighting by diffusing light from the wall. A modern, ambient finish within the interior. Combining the Deco Rail with the lighting profile results in an invisible hanging system and allows flexible adornment of the walls. With no damage to sleekly finished walls, pictures can be hung and moved around whenever you please. Hanging wires can be clicked anywhere along the rail behind the lighting profile. The indirect profile is supplied without the LED.
