

OVERVIEW RAIL SYSTEMS

For every wall or interior there is a suitable hanging system to be found within Artiteq's range. When choosing a picture hanging system, there are several factors to consider. First, you need to determine where the system should and may be mounted, namely on the wall or on the ceiling. In addition, the stage of construction or interior plans and your personal taste and any specific requirements also play a role in the choice.

Each track system has maximum load capacity, design features, lengths and colour options. It is important to consider these aspects when making your choice. In this way, you can ensure that the hanging system perfectly suits your needs and aesthetic preferences.

Below you will find an overview that clearly shows these features. This way, you can easily select the right hanging system to suit your specific situation.

At Artiteq, we understand that every project is unique, which is why we offer a wide range of hanging solutions. Whether you are looking for a simple rail system for your artwork at home, or a more advanced system for professional use, we have the right solution for you.
